A weird hybrid of puzzle, action, jump'n'run, RPG and round-based combat (a la HoMaM).

A real gem, and highly enjoyable experience.. Didn't like feminist motives, nowadays this crap is everywhere. Movies, music clips, books and now even games... It's not about that I don't believe in women, but that aggressive style of "stronk, independent woman" is ruining atmosphere.

But gameplay by itself is really fun, tons of ways to kill enemies. Even that bug when you throw enemy to the wall and enemy "goes to textures" and dies, haha, that is funny, ha... haha..ha...hahahah.ha....ha...h...h.a...a....a.a.uu.u...u.u. JA EBAL TVOJU TELKU, uuuu. Good game for being a phone app converted to computer, I am only hoping there is a possibility for an alternate history option as I have not completed the campaign yet.. This is actually a really good game...just wish there was more to it. Took only about 3h to finish, but it was definitely worth more than what was asked for it.. As a big fan of the 2nd and 3rd Just Cause games I was looking forward to this and I want to forget it exists. A Glitchy mess of poorly designed missions and undriveable vehicels. DO NOT BUY!. This is why Hitman is one of my fav series X X X X

X X X X. It's exactly fine. It works.
You kitten around the house and do some weird stuff over and over.
To say it is fun would be an overreach.
Thumb sideways would be a way better option.

<https://youtu.be/cxQU9xEMt8s>. a cute puzzle RPG with a lot of depth. it's Zelda quality. And that's not a complement I would give out easily.

Wow, what a surprise! XD 9hours of epic heroic fun time, sure some parts could be more polished, but the game core works perfectly fine and I cant wait for any prequel-sequel whatever XD. Just no.

Personally, the girls weren't even the selling point to me, the game's perceived intricate system was (the match 3 + races + upgrading a car + chatting with the girls). But most of it is redundant or a lie.

The match 3 is very simple and without a failure state. The upgrades can be just brute forced into the first car by using all the match 3 abilities, gaining currency and restarting. "Every girl has her own unique skills; Every track has its own characteristics; All cars can be upgraded;" are suppose to be selling points, but these points become irrelevant. The races are 30 second timers that mean nothing, the chatting with the girls is a cute gimmick, but has no bearing on any mechanic and is a chat bot, all cars have different starting stats, but they are upgraded the same.

The UI is different from the screenshot from the store page. The girls in-game have no stats unlike shown. The tracks have no weather elements. There are only 3 tracks and they're not interwoven like shown. The car drawn in the screenshot is not even in the game.

With the redundancy of the description and screenshots, I'd call it false advertising. I got it at .99 during sale but I regret it.. Amazing aircraft, nice to play. Solid buy.. This game really has a lot going for it. It features some stunning yet cute graphics and some very addictive gameplay.

It sort of reminds me of Captain Keen meets Diablo, only with ragdoll physics, sick weapons and some great sound effects. One minute you're shooting easy dudes with your pistol, the next you're hammering away at a mini-boss with some crazy laser cannon. Then you're out of ammo and have to beat it with your suitcase. There is also some interesting customisation options with the mutation system. Basically you're turning into an ammo-grabbing juggernaut.

Oh, and did I mention. It's very VERY challenging. You start out in a short intro-level and you think "I got this." But wait, because you don't. Somehow even with the most high-powered weapons and body armour these mutants always get me. That's why I like to stun them one by one, just to feel like I'm pawning them for a change.

If you didn't already, you will definitely want to buy this must-have gem of a game. If this is early access I can't even imagine what the full release will be like. I didn't beat it yet, but I'm sure gonna keep trying!. I wasn't exactly sure what to expect when I purchased this game, but it has exceeded my expectations and for the price, it is something that I think more people should try. Your goal is to get your 'blarps' to hit the numbered sphere to add an extra 'blarp' to your ever expanding cube. It sounds simple, but it does require planning and some thought of how you will use and manipulate physics to reach a numbered sphere randomly placed within the cube. The more blarps you have, the harder it gets and it can get really intense. If a blarp touches your wand (it's what is used to attract them and move them around) then it is game over.

Overall I think it is worth the price and is a unique game in itself for VR. It is definitely a game that is easy to pick up and understand and has the ability to keep you entertained for a good while each play session.. PsiOps was one of the best games I've ever had the fortune to play.

After longing for a PsiOps 2 I had given up hope until now.

The game is a little rough around the edges in a few places but it is incredibly fun to be able to toss around super powers. The time traveling superpower adds an awesome new twist that freshens up exploration in first person shooters. Looking forward to a sequel to this game. IGN's review is far too harsh.

. It's really surprisingly fun. I don't expect to get a lot of hours out of Blarp! Maybe another 2 myself (trying to beat my high score, as that's all there is to do) and possibly another 2 demoing it to people. I'm totally okay with that. For the price I could either buy large Snickers bar or I could spend 2 hours in a goeey, dark cage flinging eyeballs that cut shreds into a dimension of hypercolor.. Avoid this game like the plague. Infact if you want this game, go get the plague first. The game does not work on most of the machines that I've tried to run it on. The developer I believe has given up on this game, they haven't been on steam for 99 days.

If the developer reads this, if you don't plan on doing anything more with it, can you open source it and place it on github so at least I can attempt to get it to work. I've never even played a single game.. There was something really quite gripping about this games story. It's not just moving blocks around, a real story to it.. Very cool and intense gameplay, with very simple game mechanics. I like the alien feeling of the environment. Nice job!
